"A Climate of Learning and Leading"

Keynote speaker, **Dr. Peter DeWitt**, will discuss school climate. School climate is a multi-layered topic. It involves all the complexities of meeting the academic and social-emotional needs of students, as well as how to get the adults in the school to focus on both. In this presentation, Dr. DeWitt will cover topics such as self-efficacy, collective efficacy, surface to deep level learning, trauma, minoritized populations, and how leaders can create a space where all of those issues cannot just be solved, but how the potential of all students can be maximized. Conference participants will walk away with Dr. DeWitt's book, *School Climate: Leading with Collective Efficacy*.
